### Step 3: Click on Get started and select Install the IBM Cloud CLI

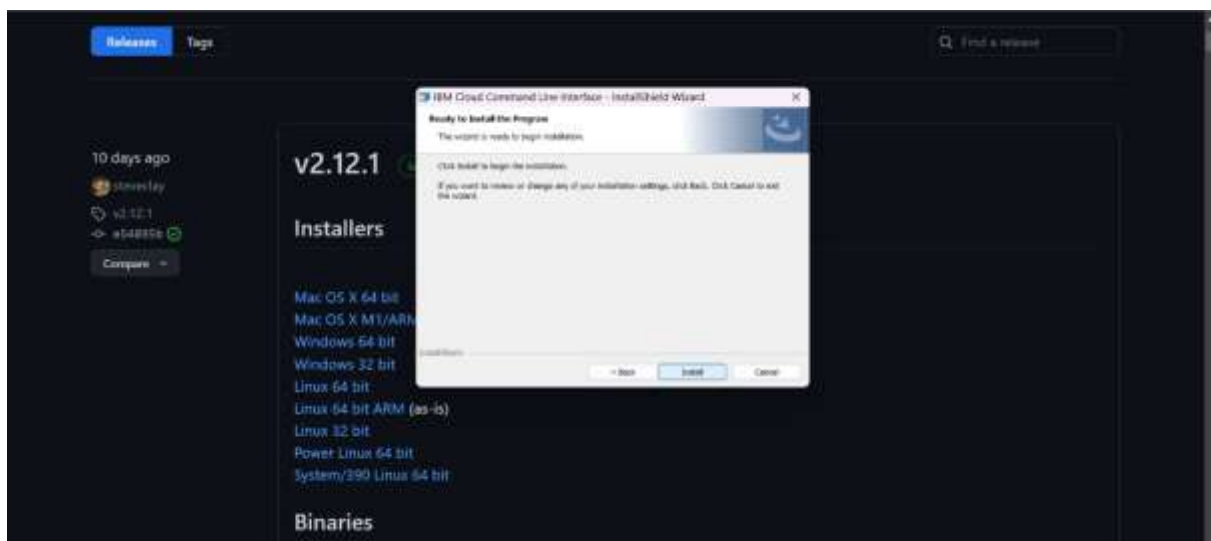

### Step 4: Above step will direct to the releases of the IBM Cloud CLI

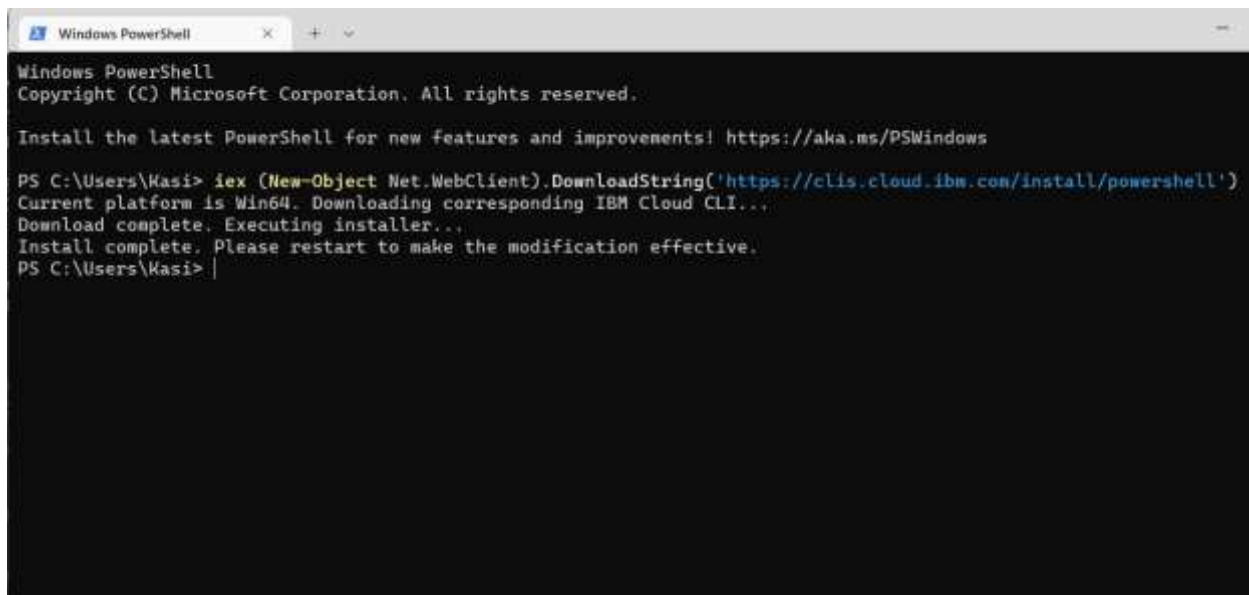

**Step 5:** Select the release , Install the application as per the instructions followed

**Step 6:** Application will be installed as .exe file

**Step 7:** Run and Install the application

**Step 8 :** Search windows PowerShell in the system and Execute commands to install the application in command prompt

A screenshot of a Windows PowerShell window. The title bar reads "Windows PowerShell". The terminal text shows the standard PowerShell startup messages, followed by a command to download and execute a script from a URL. The output indicates the script was downloaded and the installer was executed successfully.
